

Peter's soap batch log

One working journal for one batch at a time.

Print this sheet with your calculation. Record what you actually weigh and do - not only what you planned.

Batch basics

Formula / recipe:		Date:	
Purpose / use:		Method:	☐ Bar soap (NaOH)
			☐ Liquid soap/soft soap (KOH)
			☐ Cold process ☐ Hot process ☐ CPOP

Calculation

Total oil weight (g)		NaOH/KOH (g)		Liquid (g)	
Alkali purity (%)		Superfat (%)		Kalkylator / calculator	Peters / Bramble Berry

Oils - tick each oil when weighed

Check	Oil	%	g

Process and result

Oils °C		Lye solution °C		Trace	
Mould		Cut date		Cure complete	

Notes: temperature, additions, scent, colour, behaviour in the mould and what you want to change next time.

Experience after cure: lather, creaminess, feel and what you learned.
